# Contents

Preface.....	xxvii
Acknowledgments.....	xxxii
About the Author .....	xxxiii

<b>Chapter 1</b>	<b>Environmental Chemistry: An Essential Discipline in Coping with Challenges Facing Humankind.....</b>	<b>1</b>
1.1	A Catastrophic Year for Earth and Humankind.....	1
1.2	Earth and the Earth System.....	2
1.3	Biogeochemical Cycles in the Earth System.....	3
1.3.1	Oxygen Cycle .....	4
1.3.2	Nitrogen Cycle.....	4
1.3.3	Sulfur Cycle.....	5
1.3.4	Phosphorus Cycle .....	5
1.4	Natural Capital of the Earth System .....	5
1.5	What is Environmental Chemistry?.....	6
1.5.1	Environmental Chemistry and the Spheres of the Earth System .....	7
1.6	Environmental Chemistry of Water and the Hydrosphere .....	7
1.7	Environmental Chemistry of Air and the Atmosphere.....	8
1.8	Environmental Chemistry of the Geosphere.....	10
1.8.1	Soil.....	12
1.9	Environmental Chemistry of the Anthrosphere .....	13
1.10	Environmental Chemistry of the Biosphere.....	14
1.11	Toxicological Chemistry and Biochemistry .....	16
1.12	As We Enter the Anthropocene.....	17
1.13	Special Challenges to Environmental Chemistry as Global Climate Change Becomes Reality .....	17
	References .....	18
	Further Reading.....	18
<b>Chapter 2</b>	<b>The Hydrosphere and Water Chemistry.....</b>	<b>21</b>
2.1	Water: An Essential Part of Earth's Natural Capital.....	21
2.2	Sources and Uses of Water.....	23
2.2.1	The Groundwater Crisis .....	25
2.3	H <sub>2</sub> O: Simple Formula, Remarkable Molecule .....	26
2.4	Life in Water.....	27
2.5	Chemistry of Water .....	28
2.6	Gases in Water.....	29
2.6.1	Oxygen in Water.....	30
2.7	Water Acidity and Carbon Dioxide in Water .....	31
2.7.1	Carbon Dioxide in Water.....	31
2.8	Alkalinity .....	34
2.8.1	Contributors to Alkalinity at Different pH Values.....	35
2.8.2	Dissolved Inorganic Carbon and Alkalinity .....	36
2.8.3	Influence of Alkalinity on CO <sub>2</sub> Solubility .....	37

2.9	Calcium and Other Metals in Water.....	37
2.9.1	Hydrated Metal Ions as Acids .....	37
2.9.2	Calcium in Water.....	38
2.9.3	Dissolved Carbon Dioxide and Calcium Carbonate Minerals .....	39
2.10	Complexation and Chelation .....	40
2.10.1	Occurrence and Importance of Chelating Agents in Water .....	42
2.11	Bonding and Structure of Metal Complexes .....	43
2.11.1	Selectivity and Specificity in Chelation .....	43
2.12	Calculations of Species Concentrations .....	44
2.13	Complexation by Deprotonated Ligands .....	45
2.14	Complexation by Protonated Ligands .....	46
2.15	Solubilization of Lead Ion from Solids by NTA .....	47
2.15.1	Reaction of NTA with Metal Carbonate .....	48
2.15.2	Effect of Calcium Ion on the Reaction of Chelating Agents with Slightly Soluble Salts .....	50
2.16	Polyphosphates and Phosphonates in Water.....	51
2.16.1	Polyphosphates .....	51
2.16.2	Hydrolysis of Polyphosphates.....	52
2.16.3	Complexation by Polyphosphates.....	52
2.16.4	Phosphonates .....	52
2.17	Complexation by Humic Substances .....	53
2.18	Complexation and Redox Processes.....	54
	References .....	55
	Further Readings .....	55
<b>Chapter 3</b>	<b>Oxidation/Reduction in Aquatic Chemistry .....</b>	<b>59</b>
3.1	The Significance of Oxidation/Reduction in Aquatic Chemistry .....	59
3.2	The Electron and Redox Reactions .....	61
3.3	Electron Activity and $pE$ .....	63
3.4	The Nernst Equation.....	64
3.5	Reaction Tendency: Whole Reaction from Half-Reactions.....	65
3.6	The Nernst Equation and Chemical Equilibrium.....	66
3.7	The Relationship of $pE$ to Free Energy .....	67
3.8	Reactions in Terms of One Electron-Mole .....	67
3.9	The Limits of $pE$ in Water.....	69
3.10	$pE$ Values in Natural Water Systems.....	70
3.11	$pE$ - $pH$ Diagrams.....	71
3.12	Humic Substances as Natural Reductants.....	74
3.13	Photochemical Processes in Oxidation/Reduction.....	74
3.14	Corrosion .....	75
	References .....	76
	Further Readings .....	76
<b>Chapter 4</b>	<b>Phase Interactions in Aquatic Chemistry .....</b>	<b>79</b>
4.1	Chemical Interactions Involving Solids, Gases, and Water .....	79
4.2	Importance and Formation of Sediments.....	79
4.2.1	Formation of Sediments .....	79
4.2.2	Organic and Carbonaceous Sedimentary Materials .....	81

4.3	Solubilities .....	81
4.3.1	Solubilities of Solids .....	82
4.3.2	Solubilities of Gases .....	83
4.4	Colloidal Particles in Water .....	84
4.4.1	Colloids in Water and Contaminant Transport by Colloids .....	85
4.4.2	Kinds of Colloidal Particles .....	85
4.4.3	Colloid Stability .....	86
4.5	The Colloidal Properties of Clays .....	87
4.6	Aggregation of Colloidal Particles .....	88
4.6.1	Flocculation of Colloids by Polyelectrolytes .....	88
4.6.2	Flocculation of Bacteria by Polymeric Materials .....	89
4.7	Surface Sorption by Solids .....	89
4.8	Solute Exchange with Bottom Sediments .....	90
4.8.1	Trace-Level Metals in Suspended Matter and Sediments .....	91
4.8.2	Phosphorus Exchange with Bottom Sediments .....	92
4.8.3	Organic Compounds on Sediments and Suspended Matter .....	92
4.8.4	Bioavailability of Sediment Contaminants .....	94
4.9	Interstitial Water .....	95
4.10	Phase Interactions in Chemical Fate and Transport .....	95
4.10.1	Rivers .....	95
4.10.2	Lakes and Reservoirs .....	95
4.10.3	Exchange with the Atmosphere .....	96
4.10.4	Exchange with Sediments .....	96
	References .....	97
	Further Readings .....	98
<b>Chapter 5</b>	<b>Aquatic Microbial Biochemistry .....</b>	<b>101</b>
5.1	Aquatic Biochemical Processes .....	101
5.1.1	Microorganisms at Interfaces .....	101
5.2	Algae .....	102
5.3	Fungi .....	104
5.4	Protozoa .....	104
5.5	Bacteria .....	104
5.5.1	Autotrophic and Heterotrophic Bacteria .....	105
5.5.2	Oxic and Anoxic Bacteria .....	106
5.6	The Prokaryotic Bacterial Cell .....	106
5.7	Kinetics of Bacterial Growth .....	107
5.8	Bacterial Metabolism .....	107
5.8.1	Factors Affecting Bacterial Metabolism .....	108
5.8.2	Microbial Oxidation and Reduction .....	109
5.9	Microbial Transformations of Carbon .....	111
5.9.1	Methane-Forming Bacteria .....	111
5.9.2	Bacterial Utilization of Hydrocarbons .....	112
5.9.3	Microbial Utilization of Carbon Monoxide .....	112
5.10	Biodegradation of Organic Matter .....	113
5.10.1	Oxidation .....	113
5.10.2	Microbial Oxidation of Hydrocarbons .....	113
5.10.3	Other Biochemical Processes in Biodegradation of Organics .....	114

5.11	Microbial Transformations of Nitrogen.....	114
5.11.1	Nitrogen Fixation.....	116
5.11.2	Nitrification.....	117
5.11.3	Nitrate Reduction.....	117
5.11.4	Denitrification.....	117
5.12	Microbial Transformations of Phosphorus and Sulfur.....	118
5.12.1	Phosphorus Compounds.....	118
5.12.2	Sulfur Compounds.....	118
5.12.3	Oxidation of H <sub>2</sub> S and Reduction of Sulfate by Bacteria.....	119
5.12.4	Microorganism-Mediated Degradation of Organic Sulfur Compounds.....	119
5.13	Microbial Transformations of Halogens and Organohalides.....	120
5.14	Microbial Transformations of Metals and Metalloids.....	121
5.14.1	Acid Mine Waters.....	122
5.14.2	Microbial Transitions of Selenium.....	123
5.14.3	Microbial Corrosion.....	123
	References.....	124
	Further Readings.....	124
<b>Chapter 6</b>	<b>Water Pollutants and Water Pollution.....</b>	<b>129</b>
6.1	Nature and Types of Water Pollutants.....	129
6.1.1	Markers of Water Pollution.....	129
6.2	Elemental Pollutants.....	129
6.3	Heavy Metals.....	131
6.3.1	Cadmium.....	131
6.3.2	Lead.....	132
6.3.3	Mercury.....	132
6.4	Metalloids.....	133
6.5	Organically Bound Metals and Metalloids.....	134
6.5.1	Organotin Compounds.....	135
6.6	Inorganic Species.....	136
6.6.1	Cyanide.....	136
6.6.2	Ammonia and Other Inorganic Pollutants.....	136
6.6.3	Asbestos in Water.....	137
6.7	Algal Nutrients and Eutrophication.....	137
6.8	Acidity, Alkalinity, and Salinity.....	138
6.9	Oxygen, Oxidants, and Reductants.....	139
6.10	Organic Pollutants.....	140
6.10.1	Bioaccumulation of Organic Pollutants.....	140
6.10.2	Sewage.....	140
6.10.3	Soaps, Detergents, and Detergent Builders.....	141
6.10.3.1	Soaps.....	141
6.10.3.2	Detergents.....	142
6.10.3.3	Microbial Toxins.....	144
6.11	Pesticides in Water.....	144
6.11.1	Natural Product Insecticides, Pyrethrins, and Pyrethroids.....	145
6.11.2	The Emergence of Neonicotinoid Insecticides.....	145
6.11.3	DDT and Organochlorine Insecticides.....	148
6.11.4	Organophosphate Insecticides.....	148
6.11.5	Carbamates.....	149

6.11.6	Fungicides.....	150
6.11.7	Herbicides.....	150
6.11.8	Bipyridylum Compounds.....	151
6.11.9	Herbicide Heterocyclic Nitrogen Compounds.....	151
6.11.10	Chlorophenoxy Herbicides.....	151
6.11.11	Miscellaneous Herbicides.....	152
6.12	Organochlorine Compounds in Water.....	153
6.12.1	By-Products of Pesticide Manufacture.....	153
6.12.2	Polychlorinated Biphenyls.....	154
6.12.3	1,2,3-Trichloropropane in Groundwater.....	155
6.12.4	Naturally Occurring Chlorinated and Brominated Compounds.....	156
6.13	Emerging Water Pollutants, Pharmaceuticals, and Household Wastes.....	156
6.13.1	Bactericides and Antibiotics.....	157
6.13.2	Estrogenic Substances in Wastewater Effluents.....	158
6.13.3	Biorefractory Organic Pollutants.....	158
6.14	Radionuclides in the Aquatic Environment.....	160
	References.....	164
	Further Readings.....	164
<b>Chapter 7</b>	<b>World Water Crisis and Climate Change: Water Renovation and Recycling.....</b>	<b>169</b>
7.1	The Most Important Body of Water—You.....	169
7.2	Water Treatment and Water Use.....	170
7.3	Municipal Water Treatment.....	170
7.3.1	Failures in Water Treatment.....	170
7.4	Treatment of Water for Industrial and Commercial Use.....	171
7.5	Wastewater Treatment.....	172
7.5.1	Industrial Wastewater Treatment.....	172
7.6	Advanced Water Treatment.....	172
7.7	Aeration of Water.....	173
7.8	Removal of Solids.....	173
7.8.1	Dissolved Air Flotation.....	174
7.8.2	Membrane Filtration Processes.....	175
7.9	Removal of Calcium and Other Metals.....	176
7.9.1	Removal of Iron and Manganese.....	179
7.9.2	Removal of Heavy Metals from Water.....	179
7.10	Removal of Biodegradable Organics from Water and Sewage Treatment.....	180
7.10.1	Biodegradable Organics Removal from Wastewater.....	180
7.10.2	Membrane Bioreactor.....	183
7.10.3	Sludge Handling and Disposal.....	184
7.10.4	Chemical Sludges.....	185
7.10.5	Additional Purification of Water from Secondary Wastewater Treatment.....	185
7.11	Removal of Dissolved Organics.....	185
7.11.1	Removal of Herbicides.....	187
7.12	Removal of Dissolved Inorganics.....	187
7.12.1	Ion Exchange.....	187
7.12.2	Reverse Osmosis.....	188

7.12.3	Phosphorus Removal .....	189
7.12.4	Nitrogen Removal .....	190
7.13	Water Disinfection .....	190
7.13.1	Chlorine Dioxide .....	191
7.13.2	Green Ozone for Water Disinfection .....	191
7.13.3	Ferrate and Percarbonate .....	192
7.13.4	Disinfection with Ultraviolet Radiation and Photocatalytic Processes .....	193
7.13.5	Advanced Oxidation Processes for Water Treatment .....	193
7.14	Natural Water Purification Processes .....	193
7.14.1	Industrial Wastewater Treatment by Soil .....	194
7.15	Green Water and Total Water Recycle .....	194
7.16	Water Conservation .....	199
7.17	Protecting Water Supplies from Attack .....	200
	References .....	201
	Further Readings .....	201

## **Chapter 8** The Atmosphere and Atmospheric Chemistry..... 205

8.1	The Atmosphere and Atmospheric Chemistry .....	205
8.1.1	Atmospheric Composition .....	206
8.1.2	Oxides of Nitrogen and Sulfur .....	207
8.1.3	Atmospheric Methane, Hydrocarbons, and Photochemical Smog .....	207
8.1.4	Particulate Matter .....	207
8.1.5	Primary and Secondary Pollutants .....	207
8.2	How the Atmosphere Got That Way and its Natural Capital .....	208
8.2.1	Chemical and Biochemical Processes in Evolution of the Atmosphere .....	208
8.2.2	Self-Purification of the Atmosphere .....	209
8.3	Physical Characteristics of the Atmosphere .....	209
8.3.1	Variation of Pressure and Density with Altitude .....	209
8.3.2	Stratification of the Atmosphere .....	211
8.4	Energy Transfer in the Atmosphere .....	212
8.4.1	The Earth's Radiation Budget .....	213
8.5	Atmospheric Mass Transfer, Meteorology, and Weather .....	214
8.5.1	Atmospheric Water in Energy and Mass Transfer .....	214
8.5.2	Air Masses .....	215
8.5.3	Topographical Effects .....	216
8.5.4	Movement of Air Masses .....	216
8.5.5	Global Weather .....	217
8.5.6	Weather Fronts and Storms .....	218
8.6	Inversions and Air Pollution .....	218
8.7	Global Climate and Microclimate .....	218
8.7.1	Atmospheric Carbon Dioxide and Human Modifications of Climate .....	219
8.7.2	Microclimate .....	219
8.7.3	Effects of Urbanization on Microclimate .....	220
8.8	Chemical and Photochemical Reactions in the Atmosphere .....	220
8.8.1	Photochemical Processes .....	222

8.8.2	Ions and Radicals in the Atmosphere.....	224
8.8.3	Ions at Lower Altitudes in the Troposphere.....	225
8.8.4	Free Radicals.....	225
8.8.5	Hydroxyl and Hydroperoxyl Radicals in the Atmosphere.....	225
8.9	Acid–Base Reactions in the Atmosphere.....	228
8.10	Reactions of Atmospheric Oxygen.....	228
8.10.1	Tropospheric Ozone in the Unpolluted Atmosphere.....	229
8.11	Reactions of Atmospheric Nitrogen.....	230
8.12	Atmospheric Water.....	230
8.13	Influence of the Anthroposphere.....	231
8.14	Metals from Meteoroids in the Mesosphere.....	231
8.15	Chemical Fate and Transport in the Atmosphere.....	231
	References.....	233
	Further Readings.....	233
<b>Chapter 9</b>	<b>Particles in the Atmosphere.....</b>	<b>237</b>
9.1	Particles in the Atmosphere.....	237
9.2	Physical Behavior of Particles in the Atmosphere.....	239
9.2.1	Size and Settling of Atmospheric Particles.....	240
9.3	Physical Processes for Particle Formation.....	240
9.4	Chemical Processes for Particle Formation.....	241
9.4.1	Inorganic Particles.....	241
9.4.2	Organic Particles.....	242
9.5	The Composition of Inorganic Particles.....	243
9.5.1	Fly Ash.....	244
9.5.2	Asbestos.....	244
9.6	Toxic Metals in the Atmosphere.....	245
9.6.1	Atmospheric Mercury.....	245
9.6.2	Atmospheric Lead.....	246
9.6.3	Atmospheric Beryllium.....	246
9.7	Radioactive Particles.....	246
9.8	Organic Particles in the Atmosphere.....	247
9.8.1	Polycyclic Aromatic Hydrocarbons.....	248
9.8.2	Carbonaceous Particles from Diesel Engines.....	249
9.9	Effects of Particles.....	249
9.9.1	The Asian Brown Cloud: Climate and Health Effects.....	250
9.9.2	Partitioning of Semivolatile Organic Substances between Air and Particles.....	251
9.10	Water as Particulate Matter.....	251
9.11	Atmospheric Chemical Reactions Involving Particles.....	252
9.12	Control of Particle Emissions.....	254
9.12.1	Particle Removal by Sedimentation and Inertia.....	254
9.12.2	Particle Filtration.....	254
9.12.3	Scrubbers.....	255
9.12.4	Electrostatic Removal.....	256
	References.....	256
	Further Readings.....	257

<b>Chapter 10</b>	Gaseous Inorganic Air Pollutants .....	261
10.1	Inorganic Pollutant Gases .....	261
10.2	Production and Control of Carbon Monoxide .....	261
10.2.1	Control of Carbon Monoxide Emissions .....	262
10.3	Fate of Atmospheric CO .....	262
10.4	Sulfur Dioxide Sources and the Sulfur Cycle .....	262
10.5	Sulfur Dioxide Reactions in the Atmosphere .....	264
10.5.1	Effects of Atmospheric Sulfur Dioxide .....	266
10.5.2	Sulfur Dioxide Removal .....	266
10.5.3	Oxy-Fuel Combustion for Sulfur Dioxide and Carbon Dioxide Recovery .....	268
10.6	Nitrogen Oxides in the Atmosphere .....	269
10.6.1	Atmospheric Reactions of NO <sub>x</sub> .....	271
10.6.2	Harmful Effects of Nitrogen Oxides .....	273
10.6.3	Control of Nitrogen Oxides .....	274
10.6.4	Limiting Production and Emissions of Nitrogen Oxides .....	274
10.6.5	Removal of Nitrogen Oxides from Stack Gas and Engine Exhaust Gases .....	275
10.7	Acid Rain .....	276
10.8	Ammonia in the Atmosphere .....	276
10.9	Fluorine, Chlorine, and their Gaseous Compounds .....	277
10.9.1	Chlorine and Hydrogen Chloride .....	278
10.9.2	Hydrogen Chloride in the Atmosphere .....	278
10.10	Reduced Sulfur Gases .....	279
	References .....	281
	Further Readings .....	281
<b>Chapter 11</b>	Organic Air Pollutants .....	285
11.1	Organic Compounds in the Atmosphere .....	285
11.1.1	Loss of Organic Substances from the Atmosphere .....	285
11.1.2	Persistent Organic Pollutants .....	285
11.1.3	Global Distillation and Fractionation of POPs .....	286
11.2	Biogenic Organic Compounds .....	286
11.2.1	Biogenic Methane .....	287
11.2.2	Biogenic Hydrocarbons from Plants .....	287
11.2.3	Removal of Atmospheric Organic Compounds by Plants .....	289
11.3	Pollutant Hydrocarbons .....	290
11.3.1	Aromatic Hydrocarbons .....	292
11.3.2	Reactions of Atmospheric Aromatic Hydrocarbons .....	293
11.4	Carbonyl Compounds .....	294
11.5	Miscellaneous Oxygen-Containing Compounds .....	296
11.5.1	Alcohols .....	297
11.5.2	Phenols .....	297
11.5.3	Ethers .....	298
11.5.4	Oxides .....	298
11.5.5	Carboxylic Acids .....	298
11.6	Organonitrogen Compounds .....	299
11.7	Organohalide Compounds .....	301
11.7.1	CFCs and Halons .....	303

11.7.2	Atmospheric Reactions of Hydrofluorocarbons and Hydrochlorofluorocarbons .....	304
11.7.3	Perfluorocarbons .....	304
11.7.4	Chlorinated Dibenzo- <i>p</i> -Dioxins and Dibenzofurans.....	305
11.8	Organosulfur Compounds .....	305
11.9	Organic Particulate Matter .....	306
11.10	Hazardous Air Pollutant Organic Compounds.....	307
	References .....	307
	Further Readings .....	308
<b>Chapter 12</b>	<b>Photochemical Smog.....</b>	<b>311</b>
12.1	Reduced Visibility When the Sun Shines.....	311
12.2	Smog-Forming Emissions.....	312
12.2.1	Control of Exhaust Hydrocarbons .....	313
12.2.2	Automotive Emission Standards.....	315
12.2.3	Polluting Green Plants .....	316
12.3	Smog-Forming Reactions of Organic Compounds in the Atmosphere....	317
12.3.1	Photochemical Reactions of Methane.....	317
12.3.2	Addition Reactions in the Atmosphere .....	318
12.4	Overview of Smog Formation .....	319
12.5	Mechanisms of Smog Formation.....	321
12.5.1	Nitrate Radical.....	326
12.5.2	Photolyzable Compounds in the Atmosphere.....	327
12.6	Reactivity of Hydrocarbons .....	327
12.7	Importance of HO <sub>x</sub> /VOC Ratios .....	328
12.8	Inorganic Products from Smog.....	328
12.9	Effects of Smog .....	329
	References .....	332
	Further Readings .....	332
<b>Chapter 13</b>	<b>The Endangered Global Atmosphere .....</b>	<b>337</b>
13.1	Saving the Atmosphere to Save Ourselves .....	337
13.1.1	Preservation of the Atmosphere's Natural Capital .....	338
13.2	The Earth's Evolving Atmosphere and Climate Change.....	338
13.2.1	Changes in Climate.....	339
13.3	Effects of the Anthroposphere on the Atmosphere and Climate.....	340
13.3.1	Destroying the Earth's Lungs: Destruction of the Amazon Forest.....	340
13.4	The Greatest Threat to the Atmosphere and the Earth System: Global Warming .....	341
13.4.1	Methane and Other Greenhouse Gases .....	343
13.4.2	Particles and Global Warming.....	345
13.5	Consequences of Global Climate Change .....	345
13.5.1	Increasing Temperature .....	345
13.5.2	Passing the Tipping Points.....	347
13.5.3	Loss of Ice Cover .....	347
13.5.4	Glaciers and Water Supply.....	348
13.5.5	Expansion of Subtropical Arid Regions and Drought .....	348
13.5.6	Some Other Effects of Global Climate Change.....	348

13.6	Green Science and Technology to Alleviate Global Warming.....	349
13.6.1	Minimization .....	349
13.6.2	Counteracting Measures .....	351
13.6.3	Adaptation.....	352
13.7	Acid Rain.....	352
13.8	Stratospheric Ozone Destruction.....	355
13.8.1	Shielding Effect of the Ozone Layer.....	356
13.8.2	Ozone Layer Destruction .....	357
13.8.3	Green Chemistry Solutions to Stratospheric Ozone Depletion .....	359
13.9	Atmospheric Brown Clouds.....	360
13.9.1	Yellow Dust.....	361
13.10	Atmospheric Damage by Photochemical Smog .....	362
13.11	The Urban Aerosol .....	363
13.12	Nuclear Winter.....	364
13.12.1	“Doomsday Visitors” from Space.....	366
13.13	What Is to Be Done?.....	366
	References .....	368
	Further Readings .....	369
<b>Chapter 14</b>	<b>The Geosphere and Geochemistry.....</b>	<b>373</b>
14.1	The Geosphere.....	373
14.1.1	The Fragile Solid Earth and its Relationship with the Other Environmental Spheres.....	373
14.2	Physical Form of the Geosphere.....	375
14.2.1	Plate Tectonics and Continental Drift.....	375
14.2.2	Structural Geology.....	376
14.3	The Nature of Solids in the Geosphere.....	377
14.3.1	Structure and Properties of Minerals.....	377
14.3.2	Kinds of Minerals .....	377
14.3.3	Igneous, Sedimentary, and Metamorphic Rock in the Rock Cycle.....	378
14.3.4	Rock Cycle .....	379
14.4	Geochemistry and Weathering of Rock in the Geosphere .....	379
14.4.1	Physical Aspects of Weathering .....	380
14.4.2	Chemical Weathering .....	380
14.4.3	Biological Aspects of Weathering .....	382
14.5	Clays: Especially Important Weathering Products and Secondary Minerals.....	383
14.6	Sediments.....	384
14.7	Groundwater in the Geosphere.....	385
14.7.1	Water Wells .....	387
14.7.2	Water Wells and the Arsenic Problem.....	387
14.8	The Geosphere as a Source of Natural Capital .....	388
14.8.1	The Extraordinary Importance of Lithium.....	389
14.9	Environmental Phenomena of the Geosphere .....	389
14.9.1	Natural Hazards .....	390
14.9.2	Anthropogenic Hazards .....	390
14.10	Volcanoes.....	391
14.11	Earthquakes .....	392

14.12	Surface Earth Movement .....	394
14.13	Effects of Human Activities .....	396
14.13.1	Extraction of Geospheric Resources: Surface Mining .....	396
14.13.2	Environmental Effects of Mining and Mineral Extraction.....	396
14.14	Air Pollution and the Geosphere .....	397
14.15	Water Pollution and the Geosphere .....	398
14.16	The Geosphere as a Waste Repository .....	399
	References .....	400
	Further Readings .....	400
<b>Chapter 15</b>	<b>Soil: Earth's Lifeline .....</b>	<b>403</b>
15.1	Have You Thanked A Clod Today? .....	403
15.1.1	What Is Soil?.....	403
15.1.2	Agriculture and Soil.....	403
15.2	Structure of Soil.....	405
15.3	Composition of Soil .....	406
15.3.1	Water in Soil .....	406
15.3.2	The Soil Solution .....	408
15.3.3	Air in Soil .....	408
15.3.4	Inorganic Solids in Soil.....	408
15.3.5	Soil Organic Matter .....	408
15.4	Acid–Base and Ion-Exchange Reactions in Soil .....	410
15.4.1	Acid–Base Reactions of Soil.....	410
15.4.2	Adjustment of Soil Acidity .....	412
15.4.3	Ion-Exchange Equilibria in Soil .....	412
15.5	Macronutrients in Soil .....	413
15.5.1	Sulfur in Soil and as a Macronutrient.....	414
15.6	Nitrogen, Phosphorus, and Potassium in Soil.....	414
15.6.1	Nitrogen .....	414
15.6.2	Phosphorus.....	417
15.6.3	Potassium .....	417
15.7	Micronutrients in Soil.....	417
15.8	Fertilizers.....	418
15.8.1	Fertilizer Pollution .....	420
15.9	Pesticides and their Residues in Soil .....	421
15.9.1	Soil Fumigants .....	422
15.10	Wastes and Pollutants and their Degradation on Soil.....	422
15.10.1	Soil Pollutants from Livestock Production .....	424
15.10.2	Biodegradation and the Rhizosphere.....	425
15.11	Soil Loss and Degradation.....	425
15.11.1	Soil Sustainability and Water Resources .....	426
15.12	Saving the Land .....	427
15.12.1	Agroforestry.....	427
15.12.2	Soil Restoration.....	428
15.12.3	Poduculture in Soil Restoration .....	429
15.13	Green Chemistry and Sustainable Agriculture.....	430
15.14	Genetics and Agriculture.....	433
15.14.1	Recombinant DNA and Genetic Engineering in Agriculture.....	433

	15.14.2	The Major Transgenic Crops and Their Characteristics.....	435
	15.14.3	Crops versus Pests.....	435
	15.14.4	Future Crops .....	436
15.15		Agriculture and Health .....	438
	15.15.1	Food Contamination .....	438
15.16		Protecting the Food Supply from Attack.....	438
		References .....	439
		Further Readings .....	440
<b>Chapter 16</b>		<b>The Anthrosphere: Industrial Ecology and Green Chemistry .....</b>	<b>443</b>
16.1		Changing the Bad Old Ways.....	443
16.2		Green Chemistry .....	444
16.3		Reduction of Risk: Hazard and Exposure .....	446
	16.3.1	The Risks of Not Taking Risks.....	447
16.4		Waste Prevention and Green Chemistry.....	448
16.5		Green Chemistry and Synthetic Chemistry.....	448
	16.5.1	Yield and Atom Economy.....	449
16.6		Feedstocks .....	450
	16.6.1	Biological Feedstocks .....	451
16.7		Reagents.....	452
16.8		Stoichiometric and Catalytic Reagents.....	453
16.9		Media and Solvents.....	453
	16.9.1	Water, the Greenest Solvent .....	454
	16.9.2	Dense Phase Carbon Dioxide as a Solvent .....	455
	16.9.3	Gas-Expanded Solvents .....	456
16.10		Enhancing Reactions .....	456
16.11		Industrial Ecology .....	458
16.12		The Five Major Components of an Industrial Ecosystem .....	459
16.13		Industrial Metabolism.....	460
16.14		The Kalundborg Industrial Ecosystem.....	460
16.15		Attributes of Successful Industrial Ecosystems .....	461
	16.15.1	Diversity.....	462
16.16		Environmental Impacts in Industrial Ecology .....	463
16.17		Life Cycles: Expanding and Closing the Materials Loop.....	464
	16.17.1	Product Stewardship .....	465
	16.17.2	Embedded Utility.....	465
16.18		Design for Environment.....	466
	16.18.1	Products, Processes, and Facilities .....	466
	16.18.2	Key Factors in Design for Environment .....	467
	16.18.3	Hazardous Materials in Design for Environment.....	468
16.19		Inherent Safety.....	468
	16.19.1	Increased Safety with Smaller Size .....	469
16.20		Industrial Ecology and Ecological Engineering.....	469
		References .....	470
		Further Readings .....	470
<b>Chapter 17</b>		<b>Resources and Sustainable Materials.....</b>	<b>475</b>
17.1		Where to Get the Stuff We Need?.....	475
17.2		Extraction of Materials from the Geosphere .....	476

17.3	Environmental Effects of Mining and Mineral Extraction .....	477
17.4	Sustainable Utilization of Geospheric Mineral Resources.....	477
17.4.1	Metals.....	478
17.5	Metal Resources and Industrial Ecology.....	479
17.5.1	Aluminum.....	479
17.5.2	Chromium.....	480
17.5.3	Copper.....	481
17.5.4	Cobalt.....	481
17.5.5	Lead.....	481
17.5.6	Lithium.....	482
17.5.7	Zinc.....	482
17.5.8	Rare Earths.....	483
17.6	Nonmetal Mineral Resources.....	483
17.7	Phosphates.....	484
17.8	Sulfur.....	485
17.8.1	Gypsum.....	486
17.9	Wood: An Abundant Renewable Resource.....	486
17.10	Extending Resources with Industrial Ecology.....	487
17.10.1	Metals.....	487
17.10.2	Plastics and Rubber.....	488
17.10.3	Lubricating Oil.....	488
	References.....	489
	Further Readings.....	489
<b>Chapter 18</b>	<b>Sustainable Energy: The Key to Everything.....</b>	<b>493</b>
18.1	The Energy Problem.....	493
18.2	Nature of Energy.....	494
18.3	Sustainable Energy: Away from the Sun and Back Again.....	494
18.3.1	The Brief Era of Fossil Fuels.....	495
18.3.2	Back to the Sun.....	496
18.4	Sources of Energy Used in the Anthrosphere: Present and Future.....	497
18.5	Energy Devices and Conversions.....	499
18.5.1	Fuel Cells.....	502
18.6	Energy Conservation and Renewable Energy Sources.....	502
18.6.1	Renewable Energy.....	505
18.6.2	Heavy Oil.....	506
18.6.3	Shale Oil.....	507
18.6.4	Natural Gas Liquids.....	507
18.7	Natural Gas.....	507
18.8	Coal.....	508
18.8.1	Coal Conversion.....	509
18.9	Carbon Sequestration for Fossil Fuel Utilization.....	509
18.10	The Great Plains Synfuels Plant: Industrial Ecology in Practice to Produce Energy and Chemicals.....	511
18.11	Nuclear Energy.....	512
18.11.1	Thorium-Fueled Reactors.....	515
18.11.2	Nuclear Fusion.....	515
18.12	Geothermal Energy.....	516
18.13	The Sun: An Ideal, Renewable Energy Source.....	516
18.13.1	Solar Photovoltaic Energy Systems.....	517

	18.13.2	Artificial Photosynthesis for Capturing Solar Energy .....	520
18.14		Energy from the Earth's Two Great Fluids in Motion .....	520
	18.14.1	The Success of Wind Power .....	521
	18.14.2	Energy from Moving Water .....	522
	18.14.3	Energy from Moving Water without Dams .....	523
18.15		Biomass Energy: An Overview of Biofuels and their Resources .....	523
	18.15.1	Processing of Biofuel to More Compact Forms .....	526
	18.15.2	Decarbonization with Biomass Utilization .....	526
	18.15.3	Conversion of Biomass to Other Fuels .....	527
	18.15.4	Ethanol Fuel .....	528
	18.15.5	Biodiesel Fuel .....	528
	18.15.6	Fuel from Algae .....	529
	18.15.7	The Potential of Lignocellulose Fuels .....	530
	18.15.8	Chemical Conversion of Biomass to Synthetic Fuels .....	532
	18.15.9	Biogas .....	533
	18.15.10	Biorefineries and Utilizing Biomass for Energy .....	533
	18.15.11	A System of Industrial Ecology for Methane Production from Renewable Sources .....	534
18.16		Hydrogen as a Means to Store and Utilize Energy .....	534
18.17		Combined Power Cycles .....	536
		References .....	537
		Further Readings .....	537

## **Chapter 19** The Nature, Sources, and Environmental Chemistry of Hazardous Wastes ..... 541

19.1		Introduction .....	541
	19.1.1	History of Hazardous Substances .....	541
	19.1.2	Legislation .....	542
19.2		Classification of Hazardous Substances and Wastes .....	543
	19.2.1	Characteristics and Listed Wastes .....	543
	19.2.2	Hazardous Wastes .....	544
	19.2.3	Hazardous Wastes and Air and Water Pollution Control .....	544
19.3		Sources of Wastes .....	545
	19.3.1	Types of Hazardous Wastes .....	545
	19.3.2	Hazardous Waste Generators .....	546
19.4		Flammable and Combustible Substances .....	547
	19.4.1	Combustion of Finely Divided Particles .....	547
	19.4.2	Oxidizers .....	548
	19.4.3	Spontaneous Ignition .....	548
	19.4.4	Toxic Products of Combustion .....	549
19.5		Reactive Substances .....	549
	19.5.1	Chemical Structure and Reactivity .....	550
19.6		Corrosive Substances .....	551
	19.6.1	Sulfuric Acid .....	551
19.7		Toxic Substances .....	552
	19.7.1	Toxicity Characteristic Leaching Procedure .....	552
19.8		Physical Forms and Segregation of Wastes .....	553
19.9		Environmental Chemistry of Hazardous Wastes .....	554
19.10		Physical and Chemical Properties of Hazardous Wastes .....	555
19.11		Transport, Effects, and Fates of Hazardous Wastes .....	555
	19.11.1	Physical Properties of Wastes .....	556

19.11.2	Chemical Factors .....	556
19.11.3	Effects of Hazardous Wastes .....	556
19.11.4	Fates of Hazardous Wastes .....	557
19.12	Hazardous Wastes and the Anthrosphere .....	557
19.13	Hazardous Wastes in the Geosphere .....	558
19.14	Hazardous Wastes in the Hydrosphere .....	560
19.15	Hazardous Wastes in the Atmosphere .....	562
19.16	Hazardous Wastes in the Biosphere .....	563
19.16.1	Microbial Metabolism in Waste Degradation .....	563
19.16.2	Ecotoxicology of Hazardous Wastes .....	564
19.17	Hazardous Substances in Terrorism .....	564
19.17.1	Detection of Hazardous Substances .....	566
19.17.2	Removing Hazardous Agents .....	567
	References .....	567
	Further Readings .....	567

<b>Chapter 20</b>	<b>Industrial Ecology for Waste Minimization, Utilization, and Treatment .....</b>	<b>571</b>
20.1	Introduction .....	571
20.2	Waste Reduction and Minimization .....	571
20.3	Recycling .....	573
20.3.1	Examples of Recycling .....	573
20.3.2	Waste Oil Utilization and Recovery .....	574
20.3.3	Waste Oil Fuel .....	575
20.3.4	Waste Solvent Recovery and Recycle .....	575
20.3.5	Recovery of Water from Wastewater .....	575
20.4	Physical Methods of Waste Treatment .....	576
20.4.1	Methods of Physical Treatment .....	577
20.4.2	Phase Separations .....	577
20.4.3	Phase Transition .....	578
20.4.4	Phase Transfer .....	578
20.4.5	Molecular Separation .....	579
20.5	Chemical Treatment: An Overview .....	580
20.5.1	Acid/Base Neutralization .....	580
20.5.2	Chemical Precipitation .....	580
20.5.3	Coprecipitation of Metals .....	581
20.5.4	Oxidation/Reduction .....	582
20.5.5	Electrolysis .....	582
20.5.6	Hydrolysis .....	583
20.5.7	Chemical Extraction and Leaching .....	584
20.5.8	Ion Exchange .....	584
20.6	Green Waste Treatment by Photolysis and Sonolysis .....	585
20.7	Thermal Treatment Methods .....	586
20.7.1	Incineration Systems .....	587
20.7.2	Wet Air Oxidation .....	588
20.7.3	UV-Enhanced Wet Oxidation .....	588
20.7.4	Destruction of Hazardous Wastes in Cement Manufacture .....	589
20.8	Biodegradation of Wastes .....	589
20.9	Phytoremediation .....	590

20.10	Land Treatment and Composting .....	591
	20.10.1 Land Treatment.....	591
	20.10.2 Composting.....	591
20.11	Preparation of Wastes for Disposal .....	592
20.12	Ultimate Disposal of Wastes .....	594
	20.12.1 Disposal Aboveground.....	594
	20.12.2 Landfill.....	594
	20.12.3 Surface Impoundment of Liquids .....	595
	20.12.4 Deep-Well Disposal of Liquids.....	595
20.13	Leachate and Gas Emissions .....	596
20.14	<i>In Situ</i> Treatment .....	596
	20.14.1 <i>In Situ</i> Thermal Processes .....	598
	References .....	598
	Further Readings .....	599
<b>Chapter 21</b>	<b>The Biosphere: Environmental Biochemistry .....</b>	<b>603</b>
21.1	Life and the Biosphere.....	603
	21.1.1 The Biosphere in Stabilizing the Earth System: The Gaia Hypothesis.....	604
21.2	Metabolism and Control in Organisms .....	604
	21.2.1 Enzymes in Metabolism .....	604
	21.2.2 Nutrients.....	605
	21.2.3 Control in Organisms.....	606
21.3	Reproduction and Inherited Traits.....	606
21.4	Stability and Equilibrium of the Biosphere .....	607
21.5	Biochemistry.....	607
	21.5.1 Biomolecules.....	608
21.6	Biochemistry and the Cell .....	608
	21.6.1 Major Cell Features .....	609
21.7	Proteins .....	610
	21.7.1 Protein Structure.....	612
	21.7.2 Denaturation of Proteins.....	613
21.8	Carbohydrates.....	613
21.9	Lipids .....	615
21.10	Enzymes.....	617
21.11	Nucleic Acids.....	619
	21.11.1 Nucleic Acids in Protein Synthesis.....	621
	21.11.2 Modified DNA .....	621
21.12	Recombinant DNA and Genetic Engineering .....	621
21.13	Metabolic Processes .....	622
	21.13.1 Energy-Yielding Processes.....	622
21.14	Metabolism of Xenobiotic Compounds.....	623
	21.14.1 Phase I and Phase II Reactions .....	623
	References .....	624
	Further Readings .....	624
<b>Chapter 22</b>	<b>Toxicological Chemistry .....</b>	<b>627</b>
22.1	Introduction to Toxicology and Toxicological Chemistry .....	627
	22.1.1 Toxicology.....	627

22.1.2	Synergism, Potentiation, and Antagonism.....	629
22.2	Dose–Response Relationships.....	629
22.3	Relative Toxicities.....	630
22.3.1	Nonlethal Effects .....	630
22.4	Reversibility and Sensitivity .....	632
22.4.1	Hypersensitivity and Hyposensitivity .....	632
22.5	Xenobiotic and Endogenous Substances .....	632
22.6	Toxicological Chemistry.....	633
22.6.1	Toxicants in the Body .....	633
22.6.2	Phase I Reactions.....	634
22.6.3	Phase II Reactions.....	634
22.7	Kinetic Phase and Dynamic Phase.....	635
22.7.1	Kinetic Phase .....	635
22.7.2	Dynamic Phase .....	635
22.7.3	Primary Reaction in the Dynamic Phase.....	636
22.7.4	Biochemical Effects in the Dynamic Phase.....	637
22.7.5	Responses to Toxicants .....	637
22.8	Teratogenesis, Mutagenesis, Carcinogenesis, and Effects on the Immune and Reproductive Systems .....	638
22.8.1	Teratogenesis.....	638
22.8.2	Mutagenesis .....	638
22.8.3	Biochemistry of Mutagenesis.....	638
22.8.4	Carcinogenesis .....	639
22.8.5	Biochemistry of Carcinogenesis .....	640
22.8.6	Alkylating Agents in Carcinogenesis .....	642
22.8.7	Testing for Carcinogens .....	642
22.8.8	Bruce Ames Test.....	642
22.8.9	Immune System Response .....	643
22.8.10	Endocrine Disruption.....	643
22.9	Health Hazards .....	643
22.9.1	Assessment of Potential Exposure .....	643
22.9.2	Epidemiological Evidence .....	644
22.9.3	Estimation of Health Effects Risks.....	645
22.9.4	Risk Assessment .....	645
	References .....	645
	Further Readings .....	645

<b>Chapter 23</b>	<b>Toxicological Chemistry of Chemical Substances.....</b>	<b>649</b>
23.1	Introduction .....	649
23.1.1	ATSDR Toxicological Profiles.....	649
23.2	Toxic Elements and Elemental Forms .....	649
23.2.1	Ozone .....	649
23.2.2	White Phosphorus.....	649
23.2.3	Elemental Halogens .....	651
23.2.4	Heavy Metals .....	651
23.3	Toxic inorganic Compounds.....	652
23.3.1	Cyanide .....	652
23.3.2	Carbon Monoxide .....	653
23.3.3	Nitrogen Oxides .....	653
23.3.4	Hydrogen Halides .....	653

23.3.5	Hydrogen Fluoride .....	654
23.3.6	Hydrogen Chloride.....	654
23.3.7	Interhalogen Compounds and Halogen Oxides .....	654
23.3.8	Inorganic Compounds of Silicon .....	655
23.3.9	Asbestos .....	655
23.3.10	Inorganic Phosphorus Compounds .....	655
23.3.11	Inorganic Compounds of Sulfur .....	656
23.3.12	Perchlorate .....	656
23.3.13	Organometallic Compounds .....	657
23.3.14	Organolead Compounds .....	657
23.3.15	Organotin Compounds.....	657
23.3.16	Carbonyls .....	657
23.3.17	Reaction Products of Organometallic Compounds .....	658
23.4	Toxicology of Organic Compounds.....	658
23.4.1	Alkane Hydrocarbons .....	658
23.4.2	Alkene and Alkyne Hydrocarbons .....	658
23.4.3	Benzene and Aromatic Hydrocarbons.....	658
23.4.4	Toluene.....	659
23.4.5	Naphthalene .....	659
23.4.6	Polycyclic Aromatic Hydrocarbons .....	660
23.4.7	Oxygen-Containing Organic Compounds .....	660
23.4.7.1	Oxides .....	660
23.4.7.2	Alcohols .....	661
23.4.7.3	Phenols .....	661
23.4.7.4	Aldehydes and Ketones.....	662
23.4.7.5	Carboxylic Acids.....	663
23.4.7.6	Ethers .....	663
23.4.7.7	Acid Anhydrides .....	663
23.4.7.8	Esters.....	663
23.4.8	Organonitrogen Compounds.....	664
23.4.8.1	Aliphatic Amines .....	664
23.4.8.2	Carbocyclic Aromatic Amines .....	665
23.4.8.3	Pyridine.....	665
23.4.8.4	Melamine .....	665
23.4.8.5	Acrylamide: Toxic Potato Chips?.....	665
23.4.8.6	Nitriles.....	666
23.4.8.7	Nitro Compounds.....	666
23.4.8.8	Nitrosamines .....	666
23.4.8.9	Isocyanates and Methyl Isocyanate.....	666
23.4.8.10	Organonitrogen Pesticides .....	666
23.4.9	Organohalide Compounds .....	667
23.4.9.1	Alkyl Halides .....	667
23.4.9.2	Alkenyl Halides.....	668
23.4.9.3	Aryl Halides .....	668
23.4.10	Organohalide Pesticides.....	669
23.4.10.1	TCDD.....	669
23.4.10.2	Chlorinated Phenols .....	670
23.4.11	Organosulfur Compounds.....	670
23.4.11.1	Sulfur Mustards.....	670
23.4.12	Organophosphorus Compounds.....	671
23.4.12.1	Organophosphate Esters.....	671

	23.4.12.2	Phosphorothionate and Phosphorodithioate Ester Insecticides .....	672
	23.4.12.3	Organophosphorus Military Poisons .....	672
23.5		Toxic Natural Products .....	673
		References .....	673
		Further Readings .....	674
<b>Chapter 24</b>		<b>Chemical Analysis in Environmental and Toxicological Chemistry .....</b>	<b>679</b>
24.1		Analytical Chemistry .....	679
24.2		The Chemical Analysis Process .....	679
24.3		Major Categories of Chemical Analysis .....	680
24.4		Error and Treatment of Data .....	681
24.5		Gravimetric and Volumetric Analyses .....	682
24.6		Spectrophotometric Methods of Analysis .....	684
	24.6.1	Absorption Spectrophotometry .....	684
	24.6.2	Atomic Absorption and Emission Analyses .....	685
	24.6.3	Atomic Emission Techniques .....	685
24.7		Electrochemical Methods of Analysis .....	687
24.8		Chromatography .....	688
	24.8.1	High-Performance Liquid Chromatography .....	689
	24.8.2	Ion Chromatography .....	690
24.9		Methods for Water Analysis .....	690
24.10		Mass Spectrometry .....	690
24.11		Automated Analyses .....	691
24.12		Immunoassay Screening .....	692
24.13		Total Organic Carbon in Water .....	692
24.14		Measurement of Radioactivity in Water .....	693
24.15		Analysis of Wastes and Solids .....	693
	24.15.1	Toxicity Characteristic Leaching Procedure .....	694
24.16		Atmospheric Monitoring .....	694
	24.16.1	Methods for Sampling and Analyzing Atmospheric Pollutants .....	695
	24.16.2	Atmospheric Carbon Monoxide by Infrared Absorption .....	696
	24.16.3	Determination of Hydrocarbons and Organics in the Atmosphere .....	697
	24.16.4	Direct Spectrophotometric Analysis of Gaseous Air Pollutants .....	697
24.17		Analysis of Biological Materials and Xenobiotics .....	698
	24.17.1	Indicators of Exposure to Xenobiotics .....	698

# Environmental Chemistry

ELEVENTH EDITION

With clear explanations, real-world examples and updated ancillary material, the 11th edition of *Environmental Chemistry* emphasizes the concepts essential to the practice of environmental science, technology and chemistry. The format and organization popular in preceding editions is used, including an approach based upon the five environmental spheres and the relationship of environmental chemistry to the key concepts of sustainability, industrial ecology and green chemistry. The new edition provides a comprehensive view of key environmental issues, and significantly looks at diseases and pandemics as an environmental problem influenced by other environmental concerns like climate change.

## FEATURES:

- The most trusted and best-selling text for environmental chemistry has been fully updated and expanded once again
- The author has preserved the basic format with appropriate updates including a comprehensive overview of key environmental issues and concerns
- New to this important text is material on the threat of pathogens and disease, deadly past pandemics that killed millions, recently emerged diseases and the prospects for more environment threats related to disease
- This outstanding legacy appeals to a wide audience and can also be an ideal interdisciplinary book for graduate students with degrees in a variety of disciplines other than chemistry
