Preface.....	xvii
About the Author	xix
Photos.....	xxi
Chapter 1 Introduction	1
1.1 What Might a Typical Laboratory Schedule Look Like?.....	1
1.2 How Is the Instructional Laboratory Configured?	4
1.3 How to Weigh the Right Way	6
Chapter 2 An Introduction to pH Measurement: Estimating the Degree of Purity of Snow, Measuring Soil pH: Introduction to Ion Chromatography	9
2.1 Background and Summary of Method	9
2.2 Experiment	12
2.2.1 Glassware Needed per Student.....	12
2.2.2 Chemical Reagents/pH Meter Needed per Student Workstation	12
2.2.3 Ion Chromatograph	12
2.2.4 Procedure	13
2.3 Suggested Reading	14
Chapter 3 Introduction to the Visible Spectrophotometer	17
3.1 Background and Summary of Method	17
3.2 Experiment	19
3.2.1 Glassware Needed per Student or Group	19
3.2.2 Chemical Reagents Needed per Student or Group	19
3.2.3 Miscellaneous Item Needed per Student or Group.....	19
3.2.4 Spectrophotometer	19
3.2.5 Product Line History of the <i>Spec 20</i>	20
3.2.6 Troubleshooting the <i>Spec 20</i>	21
3.2.7 Procedure	22
3.3 For the Report.....	22
3.4 Suggested Reading	24
Chapter 4 Visible Spectrophotometric Determination of Trace Levels of Iron in Groundwater.....	25
4.1 Background and Summary of Method	25

4.2	Experiment	26
4.2.1	Volumetric Glassware Needed per Student.....	26
4.2.2	Gravity Filtration Setup.....	26
4.2.3	Chemical Reagents Needed per Student or Group....	27
4.2.4	Spectrophotometer	27
4.2.5	Procedure	27
4.2.6	Determination of Total Fe by FLAA or ICP-AES.....	28
4.3	For the Notebook	28
4.4	Suggested Reading	29
Chapter 5	Spectrophotometric Determination of Phosphorus in Eutrophicated Surface Water	31
5.1	Background and Summary of Method	31
5.2	Experiment	32
5.2.1	Preparation of Chemical Reagents.....	32
5.2.1.1	5 M Sulfuric Acid	33
5.2.1.2	Molybdate Reagent	33
5.2.1.3	1% Ascorbic Acid	33
5.2.1.4	Preparation of Stock Phosphorus.....	33
5.2.2	Procedure	33
5.3	For the Notebook	34
5.4	Suggested Reading	34
Chapter 6	Determination of Anionic Surfactants by Mini-Liquid–Liquid Extraction (MINI-LLE) in an Industrial Wastewater Effluent Using Ion Pairing with Methylene Blue	35
6.1	Background and Summary of Method	35
6.2	Experiment	36
6.2.1	Preparation of Chemical Reagents.....	36
6.2.1.1	Methylene Blue (MB)	36
6.2.1.2	3 M Sulfuric Acid	36
6.2.1.3	To Prepare a 0.5 M Sulfuric Acid Solution....	36
6.2.1.4	To Prepare a 0.1 M Sodium Hydroxide Solution	36
6.2.1.5	To Prepare the Wash Solution.....	36
6.2.1.6	To Prepare the MB Reagent.....	36
6.2.2	Preparation of the 100 ppm Surfactant Stock Solution and General Comments on Standards.....	37
6.2.3	Operation and Calibration of the Orion SA 720A pH Meter.....	38
6.2.4	Procedure to conduct a miniaturized liquid– liquid extraction (LLE)	38

6.3	For the Report (a Written Laboratory Report Due on This Experiment).....	39
6.4	Suggested Reading	40

Chapter 7 Comparison of Ultraviolet and Infrared Absorption Spectra of Chemically Similar Organic Compounds..... 41

7.1	Background and Summary of Method	41
7.1.1	UV-Vis Absorption Spectroscopy	43
7.1.2	Mid-Infrared Absorption Spectroscopy	44
7.2	Experiment	44
7.2.1	Items/Accessories Needed per Student or Group.....	44
7.2.2	Preparation of Chemical Reagents	45
7.2.3	Procedure to Obtain UV Absorption Spectra for Two Sets of Chemically Similar Organic Compounds: (1) Alkane Sulfonates vs. Alkyl Sulfates and (2) Two Esters with Different Carbon Backbones.....	45
7.2.4	Procedure to Obtain FTIR Absorption (Transmission) Spectra for Various Organic Compounds.....	45
7.3	For the Report.....	45
7.4	Suggested Reading	46

Chapter 8 Determination of Oil and Grease and of Total Petroleum Hydrocarbons in Wastewater via Reversed-Phase Solid-Phase Extraction Techniques (RP-SPE) and Quantitative Fourier-Transform Infrared (FTIR) Spectroscopy..... 47

8.1	Background and Summary of Method	47
8.2	Experiment	49
8.2.1	Preparation of Chemical Reagents	49
8.2.2	Reagents Needed per Student or Group of Students	49
8.2.3	Apparatus Needed per Group.....	49
8.2.4	Procedure	49
8.2.5	Percent Recovery Study	49
8.2.6	Probe-Sonication: Liquid–Solid Extraction	50
8.2.7	Calibration of the FTIR Spectrophotometer	50
8.2.8	Isolation, Recovery, and Quantitation of Oil and Grease from Wastewater Samples.....	51
8.3	Calculations	52
8.4	Suggested Reading	52

Chapter 9	Determination of the Degree of Hardness in Various Sources of Groundwater Using Flame Atomic Absorption Spectroscopy	53
9.1	Background and Summary of Method	53
9.2	Experiment	55
9.2.1	Preparation of Chemical Reagents	55
9.2.2	Chemicals/Reagents Needed per Student or Group	56
9.2.3	FLAA Operating Analytical Requirement	56
9.2.4	Preparation of the Calibration Curve	56
9.2.5	Procedure	56
9.3	For the Lab Notebook (No Report Necessary).....	57
9.4	Suggested Reading	57
Chapter 10	Determination of Lead in Drinking Water Using Graphite Furnace Atomic Absorption Spectroscopy (GFAA): External Standard vs. Standard Addition Calibration Mode	59
10.1	Background and Summary of Method	59
10.2	Experiment	63
10.2.1	Preparation of Chemical Reagents	63
10.2.2	Reagents Needed per Student or Group	63
10.2.3	Procedure	63
10.2.4	Using the WinLab® Software	63
10.2.5	Preparation of the Stock Reference Pb Standard and Start of the Autosampler	64
10.3	For the Notebook	64
10.4	Suggested Readings	65
Chapter 11	A Comparison of Soil Types via a Quantitative Determination of the Chromium Content Using Visible Spectrophotometry and Flame Atomic Absorption Spectroscopy or Inductively Coupled Plasma–Optical Emission Spectrometry.....	67
11.1	Background and Summary of Method	67
11.2	Experiment	68
11.2.1	Chemical Reagents Needed per Student or Group	68
11.2.2	Procedure for Alkaline Digestion	69
11.2.3	Procedure for Conducting Visible Spectrophotometric Analysis	69
11.2.4	Procedure for Atomic Absorption Spectrophotometric Analysis or ICP-AES	70
11.3	For the Report	70
11.4	Suggested Reading	70

Chapter 12	Data Acquisition and Instrument Control Using the Turbochrom Chromatography Software: An Introduction to High-Performance Liquid Chromatography (HPLC): Evaluating Those Experimental Parameters That Influence Separations	73
12.1	Background and Summary of Method	73
12.1.1	HPLC and TEQA	74
12.1.2	Flow-through Packed Columns	75
12.1.3	HPLC Also Refers to an Instrument That Is a High-Pressure Liquid Chromatograph	76
12.2	Experiment	76
12.2.1	Preparation of Chemical Reagents	77
12.2.2	Accessories to Be Used with the HPLC per Group	77
12.2.3	Procedure	77
12.2.3.1	Initial Observations of a Computer-Controlled High-Performance Liquid Chromatograph	77
12.2.3.2	Creating a QuickStart Method, Acquiring Data, Optimizing, Calibrating, and Conducting Analysis Using the QuickStart Method	77
12.2.3.3	Effect of Solvent Strength on k'	78
12.2.3.4	Effect of Mobile-Phase Flow Rate on Resolution	78
12.3	For the Lab Notebook	79
12.4	Suggested Reading	79
Chapter 13	Identifying the Ubiquitous Phthalate Esters in the Environment Using HPLC, Photodiode Array Detection, and Confirmation by GC-MS	81
13.1	Background and Summary of Method	81
13.1.1	Analytical Method Development Using HPLC	83
13.1.2	GC-MS Using a Quadrupole Mass Spectrometer	84
13.2	Of What Value Is This Experiment?	84
13.3	Experiment	85
13.3.1	Preparation of Chemical Reagents	85
13.3.2	Accessories to be Used With the HPLC per Student or Group	85
13.3.3	Procedure	85
13.4	For the Report	86
13.5	Suggested Reading	86

Chapter 14	An Introduction to Gas Chromatography: Evaluating Experimental Parameters That Influence Gas Chromatographic Performance	87
14.1	Background and Summary of Method	87
14.2	Brief Description of Gas Chromatographs Located in the Hazardous Waste Analysis Lab at Michigan State University	88
14.3	Principle of Separation in GC	89
14.4	Experiment	89
14.4.1	Preparation of Chemical Reagents	89
14.4.2	Accessories to Be Used with the GC per Group	90
14.4.2.1	Summary of Turbochrom Methods to Be Used in this Experiment	90
14.4.3	Procedure	90
14.4.3.1	Measurement and Adjustment of Carrier Gas Flow Rate and Split Ratio	90
14.4.3.2	Comparison of the FID vs. the ECD Sensitivity	91
14.4.3.3	Injection Volume vs. GC Peak Shape	91
14.4.3.4	Flow Rate vs. Capillary Column Efficiency	91
14.4.3.5	Column Temperature vs. Capacity Factor	91
14.5	For the Lab Notebook	92
14.6	Suggested Readings	92
Chapter 15	Screening for the Presence of BTEX in Wastewater Using Liquid–Liquid Extraction (LLE) and Gas Chromatography: Screening for THMs in Chlorine-Disinfected Drinking Water Using Static Headspace (HS) Gas Chromatography	93
15.1	Background and Summary of Method	93
15.2	Of What Value Is This Experiment?	95
15.3	Experimental	95
15.3.1	Preparation of Chemical Reagents	95
15.3.2	Chemicals/Reagents Needed per Group	95
15.3.3	Items/Accessories Needed per Student or per Group	96
15.3.4	Preliminary Planning	96
15.3.5	Procedure for BTEX Instrumental Analysis Using Mini-LLE Techniques	96
15.3.5.1	Selecting the Most Suitable Extraction Solvent	96
15.3.5.2	Preparation of the Primary Dilution Standard and Working Calibration Standards	96

15.3.6	Procedure for THM Instrumental Analysis Using HS Techniques.....	97
15.3.7	Procedure to Conduct a Screen for BTEXs via Mini-LLE and Subsequent Injection into a GC-FID.....	98
15.3.8	Procedure to Conduct Manual Headspace Sampling and Direct Injection into a GC-ECD	98
15.4	For the Report.....	98
15.5	Suggested Readings.....	98
Chapter 16	Determination of Priority Pollutant Volatile Organic Compounds (VOCs) in Gasoline-Contaminated Groundwater Using Static Headspace (HS) and Solid-Phase Microextraction Headspace (SPME-HS) and Gas Chromatography	99
16.1	Background and Summary Method	99
16.2	Of What Value Is This Experiment?	100
16.3	Use of <i>t</i> Statistics	101
16.4	Experimental	102
16.4.1	Preparation of Chemical Reagents	102
16.4.2	Chemicals/Reagents Needed per Group	102
16.4.3	Items/Accessories Needed per Student or per Group.....	102
16.4.4	Preliminary Planning	102
16.4.5	Procedure for BTEX Instrumental Analysis HS Techniques.....	103
16.4.6	Technique to Conduct a Manual Headspace Sampling and Direct Injection Using a Gas-Tight Sampling Syringe	104
16.4.7	Technique to Conduct an SPME Headspace Sampling and Injection/Thermal Desorption Using an SPME Syringe/Fiber Assembly	104
16.5	For the Report.....	105
16.6	Suggested Readings.....	105
Chapter 17	Determination of the Herbicide Residue Trifluralin in Chemically Treated Lawn Soil by Gas Chromatography Using Reversed-Phase Solid-Phase Extraction (RP-SPE) Sample Prep Techniques	107
17.1	Background and Summary of Method	107
17.1.1	Solid-Phase Extraction	108
17.1.2	Internal Standard Mode of Calibration	110
17.2	Experiment	111
17.2.1	Preparation of Chemical Reagents	111

17.2.2	Chemicals/Reagents/Accessories Needed per Group.....	111
17.2.3	Preparation of the Working Calibration Standards..	111
17.2.4	Establishing the Calibration	112
17.2.5	Isolating Trifluralin from Lawn-Treated Soil Using RP-SPE Techniques	112
17.3	For the Report.....	112
17.4	Suggested Reading	113
Chapter 18	Determination of Priority Pollutant Semivolatile Organochlorine Pesticides: A Comparison of Mini-Liquid–Liquid and Reversed-Phase Solid-Phase Extraction Techniques	115
18.1	Background and Summary of Method	115
18.2	Experimental	118
18.2.1	Preparation of Chemical Reagents	118
18.2.2	Chemicals/Reagents Needed per Group	118
18.2.3	Preliminary Planning	119
18.2.4	Selection of a Suitable Internal Standard	119
18.2.5	Procedure for Calibration and Quantitation of the GC-ECD.....	119
18.2.6	Procedure for Performing Mini-LLE and RP-SPE.....	120
18.3	For the Report.....	120
18.4	Suggested Reading	121
Chapter 19	Determination of Priority Pollutant Polycyclic Aromatic Hydrocarbons (PAHs) in Contaminated Soil Using RP-HPLC-PDA with Wavelength Programming.....	123
19.1	Background and Summary of Method	123
19.2	Of What Value Is This Experiment?	125
19.3	Experiment	125
19.3.1	Preparation of Chemical Reagents	125
19.3.2	Accessories to Be Used with the HPLC per Group.....	126
19.3.3	Procedure	126
19.3.3.1	Creating the Wavelength Program Method	126
19.3.3.2	Extraction Procedure for Soil	126
19.3.3.3	Calculation of the # ppm of Each PAH in Contaminated Soil.....	127
19.4	For the Report.....	127
19.5	Suggested Reading	130

Chapter 20	How to Set up and Operate an Ion Chromatograph	131
20.1	Determination of Inorganic Anions Using Ion Chromatography (IC): Anion Exchange IC with Suppressed Conductivity Detection	131
20.1.1	Background	131
20.2	How Do I Operate the Ion Chromatograph?	133
20.3	Is There a Need for Sample Prep?	134
20.4	How Do I Prepare a Reference Stock Standard for Each Anion?	134
20.5	How Do I Prepare the Bicarbonate/Carbonate Eluent from Scratch?	135
20.6	How Do I Prepare a Mixed Anion Stock Standard for IC?	135
20.7	How Do I Prepare a Four-Level Set of Calibration Standards for IC?	136
20.8	What Does the Data Look Like?	136
20.9	Suggested Reading	137
Index		139

Laboratory Experiments in Trace Environmental Quantitative Analysis is a collection of student-tested experiments that introduce important principles that underlie various laboratory techniques in the field of trace environmental organics and inorganics quantitative analysis. It crosses the more traditional academic disciplines of environmental science and analytical chemistry.

The text is organized to begin with minimally rigorous sessions/experiments and increase in rigor as each session/experiment unfolds. Each experiment features learning objectives, expected student outcomes, and suggestions for further study.

Additional features include:

- Students are introduced to the principles and laboratory practice of instrumental analysis (determinative techniques) which are clearly presented.
- Students are carefully taken through various ways to prepare samples for trace quantitative analysis (sample prep techniques). Safety warnings are listed within each experiment.
- Students are introduced to all three types of instrument calibration: external, internal, and standard addition.

Instructors who are responsible for laboratory courses in analytical chemistry with potential application to environmental sample matrices will find this textbook of value. Graduate programs in environmental science and engineering will also greatly benefit from the content.
