Vikas Mittal

Contents

Preface	XI
1. Polymers for Gas Treatment	1
1.1 Background	1
1.1.1 Gas Treatment	1
1.1.2 Acid Gases	2
1.1.3 Mainstream Gas Treatment Processes	2
1.1.4 Gas Treatment by Membranes	4
1.2 Polymeric Membranes	6
1.2.1 Overview	6
1.2.2 Classification of Polymeric Membranes	7
1.2.3 Separation Mechanism of Polymeric Membranes	8
1.2.4 Commercial Polymeric Membranes	10
1.2.5 Challenges Associated with Polymeric Membranes	12
1.3 Recent Advances in Polymeric Membranes	14
1.3.1 Dense Polymeric Membranes	15
1.3.2 Polymers of Intrinsic Microporosity	23
1.3.3 Thermally Rearranged Polymeric Membranes	27
1.4 Conclusions	30
References	31
2. Polymers for Gas Sensing	45
2.1 Introduction	45
2.2 Conducting Polymers	47
2.2.1 Synthesis of Conducting Polymers and Their Thin Films	48
2.2.2 Electronic Properties of Conducting Polymers	52
2.3 Non-Conducting Polymers	54
2.4 Gas Sensors	54
2.4.1 Performance Indicators and Gas Sensor's Stability	55

2.5	Polymers for Gas Sensing and Gas Sensors	56
2.6	Conclusions	68
	References	68
3.	Polymers in Intelligent Construction	77
3.1	Introduction	77
3.2	Smart Polymers in Construction	79
3.2.1	Wall Insulation Polymeric Foams	79
3.2.2	Self-Healing Polymers	82
3.2.3	Anti-Corrosion Polymers	84
3.2.4	Polymeric Concrete Additives	86
3.2.5	Self-Cleaning Polymers	88
3.3	Conclusions	89
	References	92
4.	Polymers and Composites for Optical Applications	95
4.1	Introduction	95
4.2	Terms Related to the Optical Properties of the Polymeric Materials	95
4.3	High Refractive Index Polymers (HRIPs)	96
4.3.1	Sulfur Containing HRIPs	97
4.3.2	Phosphorus Containing HRIPs	99
4.3.3	Halogen Containing HRIPs	101
4.3.4	Silicon Containing HRIPs	102
4.3.5	Other Nanocomposite HRIPs	103
4.4	Non-linear Optical Polymers	106
4.4.1	Poly(alkyl vinyl ether)s	106
4.4.2	Polystyrenes (PS)	107
4.4.3	Polymethacrylates	108
4.4.4	Other Non-linear Optical Polymers	110
4.5	Conclusions	111
	References	111
5.	Polymers and Copolymers Utilized in Photovoltaic Applications	121
5.1	Introduction	121
5.2	Factors Influencing Power Conversion Efficiency of Polymer Solar Cell Devices	121
